

Plasticity of Myeloid Cells

Call for Application

BioMed X will establish a new research group in the field of Immunology.

1 Group Leader (m/f)

2 Postdoctoral Researchers (m/f)

2 Research Assistants (m/f)

The main objective of the project is to harness myeloid cell plasticity to counteract pro-inflammatory differentiation and activation, and to restore homeostasis in immune-mediated diseases.

Application deadline: **April 29, 2018**

About BioMed X

The BioMed X Innovation Center is an exciting new collaboration model at the interface between academia and industry. At our center, distinguished early career scientists recruited from all over the world are working jointly on novel pre-clinical research projects in the fields of biomedicine, molecular biology, cell biology, diagnostics and consumer care.

This research project is sponsored by **Roche**.
